50/50 GALLON

Dynamic Duo

Double up your fuel reserve with a 50/50 split refueling tank!

With two 50-gallon tanks in the back of your truck, this unique tank system provides the most versatility.

Transfer Flow refueling tanks come complete with everything needed for installation.

Our 50/50 split refueling tank system is Department of Transportation (DOT) legal to carry and transfer gasoline, diesel, and kerosene. The easy-to-use hose-purge feature allows you to pull any fuel left in the hose back into the refueling tanks to eliminate messes in the truck bed.

The 50/50 split refueling tank is made from 12-gauge, high-yield U.S. aluminized steel, for superior durability and strength; and powder coated black. This tank system comes with two 50-gallon fuel tanks, two 12-volt refueling pumps, two 12-foot hoses, two nozzles, two wire harnesses with dash-mounted power switches, mounting hardware, rollover valves, and fuel caps.

SHORT AND LONG BED

Fits: All Full-Size Trucks
Fuel: Gas, Diesel, and Kerosene
Ship Weight: 332 lb.
Dimensions: 47 3/8" L × 31" W × 24 3/8" H
Part Number: 080-01-13244
